14	3	BUF @ HOU	BUF	-1.5	46.8%	46.9%	43.2%	
15	2	MIA @ LV	LV	+3.5	38.5%	52.4%	65.4%	
16	1	NYJ @ TEN	TEN	+1.5	34.8%	50.3%	56.8%	

Confidence points: rank 1 is the most confident pick and carries the most points; assign them highest-to-lowest in a standard confidence pool. Model A is football-only (opponent-adjusted EPA and QB ratings). Model B adds the current Vegas spread. Market is the spread-implied home win probability. All probabilities are the HOME team's chance of winning; the Pick column already accounts for that. Spread is from the home team's perspective.
